This is a feature you've been asking for and we want your input on it You can always use the controllers like normal, but if you want to try our new physical mouse feature, just put the controllers down and move your mouse and you'll automatically switch.. We've been busy getting this latest release ready for you We introduce 0 3 0, our next phase in your productivity & collaboration experience.

Meet with up to 3 additional people with our voice calling and content sharing Bring your favorite and most used applications into VR, but don't limit them to your monitors or screen size.. 3 1 in order to join meetingsKeep sending us feedback so we can continue making vSpatial a better experience.. Start meeting with any of your PC VR friends (We support both the Oculus Rift store and the Steam VR store (Vive, Vive Pro, & Windows MR headsets))•Carousel Adjustments! This has been a very common request from you and we listened! You can now make the app carousel bigger or smaller by using the Up & Down on your left controller joystick•You can also raise/ lower the carousel by pushing the left joystick in and then raising your arm higher or lower.. Today we're releasing 0 3 5 Below are some of the updates we've included:•AVATARS! Now jump into meetings with head and hand tracking using the new Oculus expressive avatars (they are cross platform, so steam users can pick a pre-built avatar by clicking your profile)•We've added in more improvements to the settings app where you can now select a separate audio output and input for whatever reason you want•A clean slate- When you launch vSpatial, all apps are now above your space and you simply point and grab to bring them down into your ring of apps•Audio quality has improved and become more stable•Squashed MANY bugs: thanks to everyone who helped us document and find these :)AGAIN! BE ON 0.. Some of the additional changes are:•Rendering order issues have been fixed•Corrected the controller instructions on the Terms of Service and Privacy Policy screen•Updated your profile.

com/support-vSpatial Dev Team BUG FIXES:We just pushed 0 2 8 with quite a few bug fixes thanks to everyone's notes and feedback! Please continue to contact us with things you're seeing AND ANY suggestions and ideas you have as well.. Keep on vSpatial-ing! 0 3 1: Introducing mouse support as a beta feature & 2-factor authentication:Hey there vSpatial-ers!As always, thanks for being part of our early access.

2 9:• Now support better device management for tutorials (including Vive Pro and other devices outside of the usual Vive, Rift, & Windows MR)• Fixed a lighting issue that caused the room to be darker than normal• Hide Carousel enabled: Depending on the headset push the left joystick down (rift) or left touchpad down (Windows MR & Vive) to toggle hiding your carousel apps for when you need to escape and take a breatherPlease continue to send us notes on bugs, feedback, and improvements you would like to see at: <https://vsatial..> Keep sending us feedback so we can continue making vSpatial a better experience As we are Early Access, please continue to help us out by sending us your notes on bugs, feedback, and also improvements you'd like to see at <https://vsatial..> We've got a lot more we're continuing to work on so keep an eye on us As this is Early Access, continue to send us notes on bugs, feedback, and improvements you would like to see at:<https://vsatial..>

3 4 TO MEET WITH OTHER USERS, otherwise audio will NOT workKeep sending us feedback so we can continue making vSpatial a better experience.. We're actively listening and have already begun work on some of your ideas Here's some of our changes:•Fixes to general stability•Fixes to grabbing•Fixes for carousel rotations•Fixed slack presence issues•Fixed meeting add button bugs•Fixed tablet keyboard numbers•Fixes to shared screen drawings•Updates and fixes to tutorials•vSpatial apps persist their positions between sessionsCheers!-vSpatial Dev Team.. We're busy fixing bugs and building improvements based off your feedback Below are some of the new items fixed in 0.. Today we're releasing 0 3 1 and have a few noticeable changes for you A couple larger improvements to highlight are:•We've updated the accounts to only use 2-factor authentication helping your accounts to be more secure and easier to manage•We introduce as a beta feature support for your physical mouse.. 3 3 in order to join meetings We are aware of a known issue if you right click with the mouse on the hidden UI under the app windows that windows can get stuck until you left click again.. 3 5 TO MEET WITH OTHER USERS, otherwise audio will NOT workKeep sending us feedback so we can continue making vSpatial a better experience.. 0 2 9:Hey there vSpatial-ers!Thanks for being part of our early access, we thank you for your feedback and ideas.. Today we're releasing 0 3 2N Below are some of the updates we've included:•Improved performance with sharing•Improved performance on curved screens•World mouse enhancements•Fixes to some meetings with port issues***Please note all users must be on the latest 0.. Today we're releasing 0 3 4 Below are some of the updates we've included:•We've updated to a new meeting backend for meetings that should resolve issues for those behind firewalls•Added in more features to the Settings menu including some background noise cancellation for those you're in meetings with, better volume controls, etc•Scrolling up and down on your physical mouse (when NOT pointing at screens) resizes the app window ring•Scrolling left and right on your physical mouse (or holding shift on keyboard and vertical scrolling with the mouse) will rotate the app window ring left and right•Made the web-cam quicker and more stable•Squashed MANY bugs: thanks to everyone who helped us document and find these :)AGAIN! BE ON 0.
